NBA JAM Kit

SECTION
ONE

Operation

Safety Notices

The following safety hints apply to all kit operators and service personnel. Specific warnings and cautions will be found throughout this manual where they apply. We recommend that you read this page, and also all of Section One, before preparing your kit for play.

CAUTION

Notice: Salvaged Parts

Parts salvaged from old games are required to complete your kit. These salvaged parts must operate perfectly; otherwise, the converted game can not perform properly or safely. Always repair circuit board malfunctions and cabinet damage before conversion is attempted.

Notice: Power Supply

Be sure the power supply from your old game is capable of +5V at 5A and +12V at 2A. These operating voltages are necessary for your kit. Your power supply must be FCC approved.

Notice: Monitor

This kit is not intended for use with X-Y monitors. Suitable monitors have horizontally mounted CRT's and raster electronics with inputs for red, green, and blue video, as well as Composite Negative Sync inputs.

Notice: Coin Mechanism

Be sure to clean and lubricate your old coin mechanisms. Servicing them is crucial to your game's earning potential and operation.

Notice: Coin Meters

Coin meters are not provided with this kit. Wiring information is provided as a convenience to the operator.

Notice: Servicing, Installing

Always turn your game OFF and unplug it before attempting to service or install your kit.

ATTENTION!

PROPERLY ATTACH ALL CONNECTORS. Make sure that the connectors on each printed circuit board (PCB) are properly connected. If the connectors do not slip on easily, do not force them. A reversed connector may damage your kit and void the warranty. All connectors are keyed to fit specific pins on each board.

Conversion Procedure

Inspection

Unpack the materials from the carton and inspect for obvious signs of damage. Use this checklist to be sure your kit is complete.

Cabinet Modifications

This kit can be installed into a 2 player or a 4 player game cabinet. The software will configure itself to a 2 or 4 player game based upon Dip Switch Setting UJ2 (see page 1-15).

1. Fill in gouges with a good quick-hardening wood putty. Sand cabinet and wipe it clean.
2. Repaint the cabinet with black semi-gloss paint. For games with wood grain sides: remove the old decals and clean the glue residue before painting. Allow paint to dry completely.
3. Pencil a line roughly at the top of the old graphic. Lightly moisten the cabinet with soapy water. Apply the decal starting at the top and working down. After the decal is in place, smooth it down, taking care to squeeze out the air bubbles. If you miss an air bubble, pop it with a razor blade or a pin and burnish it down. Allow 12 hours for the adhesive in the decals to set. Remove masking from decal.
4. Check the kit for an FCC sticker and apply it over the existing sticker on the cabinet.

When Midway ships a game, it is in compliance with FCC regulation. Your sticker is proof. If the sticker is missing or damaged, legal repercussions to the owner or distributor of the game may result. If your game kit does not contain an FCC sticker, call Midway Manufacturing Company immediately. Order by part number 16-8587-795.

5. Apply the Game Play Instruction Decal (number 23 on the decal sheet) to the CRT viewing glass. Be sure the decal does not obstruct the CRT.

Control Panel Modifications

IMPORTANT: Placement of joysticks must be horizontal to the control panel for proper playing capability, (see control panel layout on page 1-6).

1. Remove the control panel buttons and joysticks and remove the old vinyl covering.
2. Use the Control Panel Templates to help you design your control panel. You will need to use a separate template for each player you intend to install. Position the joystick and buttons at a comfortable angle for each player. Refer to page 1-6 for template layout.
3. Drill holes as needed for the joysticks and control panel buttons. Plug previous holes with wood blocks, putty, cardboard, or epoxy. File the new holes smooth.

4. Carefully remove the backing on the vinyl control panel overlay. Place the overlay on top of the control panel. Prevent air bubbles from getting under the vinyl overlay.
5. After the overlay is on securely, use a razor knife to trim excess and to cut holes for the control panel buttons and joysticks. Then, position the stickers around the appropriate locations. Refer to pages 1-7 for control panel button and joystick sticker locations.
6. Next, mount the pushbutton switches onto the control panel. Remove the switch from the pushbutton; Grasp the switch firmly on the left and right sides and squeeze the prongs together, (do not grasp the switch by the solder lugs). Carefully pull the switch off the housing. Unscrew the nut from the housing. Push the switch housing through the control panel from the front. Screw the nut back onto the switch housing from the back of the control panel. Carefully push the switch back into the switch housing.
7. To mount the joystick assembly to the control panel first position the switch assembly so that the square base is against the back of the control panel and the hole in the base lines up with the joystick hole in the control panel. Be sure that one of the blade switches point toward the monitor when the control panel is closed. Secure the switch assembly to the control panel. Remove the e-ring, white plastic spacer, and spring from the joystick shaft. Slip the black plastic washer around the joystick shaft so the rough side faces the handle. Push the shaft through the joystick base from the front of the control panel. After the shaft is through the base, replace the spring, spacer, and e-ring.
8. Mount the volume control, using the screws provided, where it is easily accessible. On top of the cash box, or on the wall near the sound board are two possible locations.

Decal Placement for a 4 Player Cabinet

Installing PC Boards and Wiring into a JAMMA Game Cabinet

1. Disconnect and remove the existing CPU and sound board in the JAMMA game cabinet.
2. Mount the CPU board inside the JAMMA game cabinet where the old CPU board was located. Mount the sound board next to the CPU board using the stand-offs and screws provided.

NOTE

If you choose to use your own JAMMA cable and not the one provided in the kit, be sure to check the JAMMA Cable Chart to verify that it is compatible.

3. If you choose to use the JAMMA cable provided with the kit, unsolder the old JAMMA cable from the speaker, power supply, control panel switches (may already be disconnected), and coin door. Remove the cable from the game. If you are not going to use the JAMMA cable provided with the kit, check the JAMMA Cable Chart to be sure the old cable is compatible. Leave the power supply chassis as is.

CAUTION

Properly insulate any unused wires within the JAMMA cable, especially the gray, gray-green, and the gray-yellow wires. This is a fully wired JAMMA cable. Many of the wires will not be used for this kit. These wires have been installed so that you can use this cable for future kits.

4. Connect the JAMMA cable to P1 on the CPU board. Using the JAMMA Cable Chart or the Cabinet Wiring Diagram for reference, solder the correct JAMMA cable wires to the speaker, power supply, and the coin door. When connecting the control panel buttons and joystick switches, be sure to connect the correct color stripe wires to the correct switch. Follow the JAMMA Chart or the Cabinet Wiring Diagram, both in Section 3 of this book.
5. Connect the ribbon cable from P1 on the sound board to P12 on the CPU board. *Be sure that the red line on the ribbon cable connects to the same pin on both boards.* Connect the wire harness cable from P7 (speaker), and P6 (power), on the sound board to P3 (sound power speaker connector) on the CPU board.

NOTE

The ribbon cable may need to be twisted in order to connect it properly.

6. Only P1, P3, P5, P6 and P12 are used on the CPU Board. All other connectors on the CPU are not used.
7. Place the FBI Warning Label on the inside of the cabinet next to the PC boards. Be sure the label is completely visible.

Installing PC Boards and Wiring into a NON-JAMMA Game Cabinet

1. Disconnect and remove the existing CPU board in the game cabinet.
2. Mount the CPU board inside the game cabinet where the old CPU board was removed. Mount the sound board next to the CPU board using the stand-offs and screws provided.
3. Leaving several inches of wire, cut the wires at the coin door, control panel switches (which may already be disconnected), speaker, and power supply. Remove the existing harness from the cabinet. Leave the cable hooks in place.

CAUTION

Properly insulate any unused wires within the JAMMA cable, especially the gray, gray-green, and the gray-yellow wires. This is a fully wired JAMMA cable. Many of the wires will not be used for this kit. These wires have been installed so that you can use this cable for future kits.

4. Connect the JAMMA cable to P1 on the CPU board. Using the JAMMA Cable Chart or the Cabinet Wiring Diagram for reference, solder the correct JAMMA cable wires to the speaker, power supply, and the coin door. When connecting the control panel buttons and joystick switches, be sure to connect the correct color stripe wires to the correct switch. Follow the JAMMA Chart or the Cabinet Wiring Diagram, both in Section 3 of this book.

NOTE

Be sure all spliced wires are well insulated with black electrical tape.

5. Connect the ribbon cable from P1 on the sound board to P12 on the CPU board. *Be sure that the red line on the ribbon cable connects to the same pin on both boards.* Connect the wire harness cable from P7 (speaker), and P6 (power), on the sound board to P3 (sound power speaker connector) on the CPU board.

NOTE

The ribbon cable may need to be twisted in order to connect it properly.

6. Only P1, P3, P5, P6 and P12 are used on the CPU Board. All other connectors on the CPU are not used.
7. Place the FBI Warning Label on the inside of the cabinet next to the PC boards. be sure the label is completely visible.

Game Features

NBA JAM is a one to four player kit.

Starting Up

Switch ON power to the game. A "rug" pattern appears on the CRT screen. When the "rug" pattern ends, the screen shows CHECKING SCRATCH RAMS, and then CHECKING ROMS. The next screen shows NBA JAM REVISION LEVEL, CMOS TEST OK, and the COIN SETTING. The game then moves to the Attract Mode.

Insert the desired amount of coins or tokens. Select which player receives the credit by pressing the appropriate Player Start Button.

NOTE: When an error is detected during Start-up Tests, game start-up does not progress, and an error message appears on the screen.

Player Controls

Player Start Button

Each start button allows the corresponding player to begin game play.

Turbo Button

The Turbo Button enables players to run faster and it enhances other actions as well (i.e. dunks, faster passes, etc.).

Shoot/Block Button

The Shoot/Block Button enables players to cause their on-screen player to shoot on offense and jump/block on defense.

Pass/Steal Button

The Pass/Steal Button enables players to cause their on-screen player to pass on offense and steal on defense.

Joystick

Each players Joystick controls the eight-way movement of their on screen player.

Control Panel Layout

2 Player Control Panel

4 Player Control Panel

Game Operation

The NBA JAM Control Switches are located inside the coin door. These switches allow the operator to customize some features of the game.

CONTROL SWITCHES

■ The **COIN DOOR SLAM TILT SWITCH (optional)** detects any forceful vibrations against the Coin Door. This eliminates pounding for free games.

■ The **VOLUME CONTROL** allows increasing or decreasing the volume level of the game music and speech. For greater profits, set your games volume at the loudest tolerable level.

■ The **TEST/DIAGNOSTICS SWITCH (optional)** allows you to activate the games Menu System. Move the Test Switch to access the Main Menu. To exit the Menu System, select EXIT TO GAME OVER from the Main Menu, then press any control panel button, or return the Test Switch back to its original position.

■ The **SERVICE CREDIT SWITCH (optional)** is a special feature switch that allots credit without affecting the games bookkeeping total.

Control Switch Location

Menu System Operation

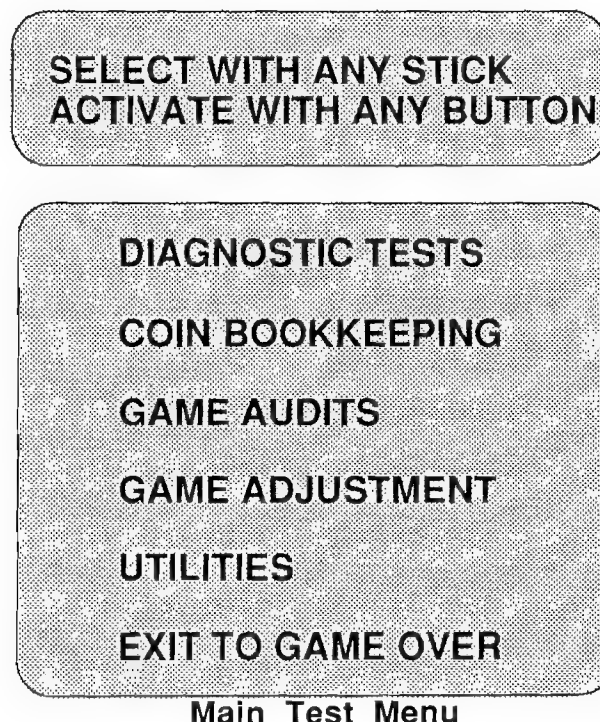

OPERATION

All NBA Jam Game Audits, Adjustments, and Diagnostics are options of the Main Menu. Each option, in turn, has its own menu, listing several choices that you may act upon as desired.

Move the Test Switch (on the cashbox lid panel) to activate the Main Menu (shown below). Game adjustments, bookkeeping, and diagnostics are all accessible from this menu.

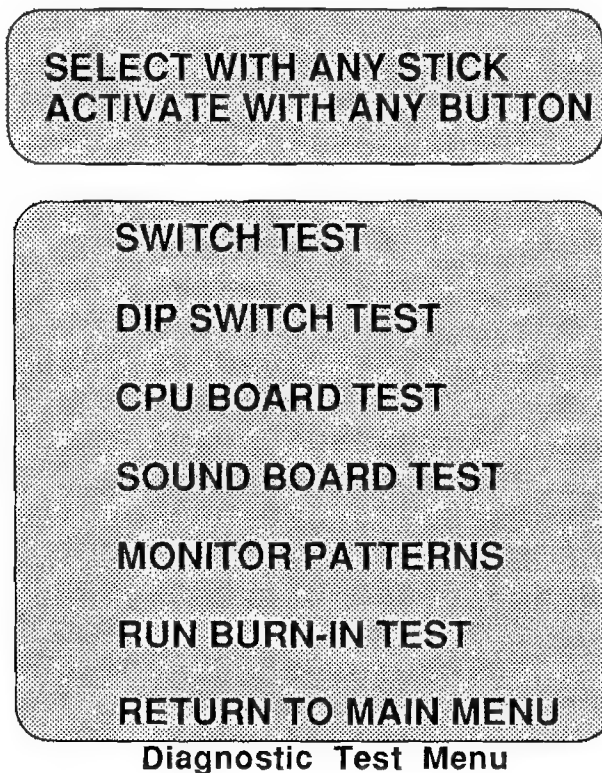

Move any joystick up or down to cycle through the menu options. Notice that the options are highlighted in sequence. Press any button to activate a highlighted option.

Note: Only highlighted options can be activated.

DIAGNOSTIC TESTS

To enter the Diagnostic Tests from the Main Menu, move any joystick to select (highlight) the Diagnostic Test option, and press any control panel button to activate the option.

Switch Test

The Switch Test allows the operator to test the switches on the control panel and the coin door.

Select the Switch Test by using any joystick to highlight the Switch Test option; then, press any control panel button to activate it. The top of the screen shows a layout of the control panel and the bottom of the screen lists the coin door switches. Pressing a switch causes the corresponding switch location on the screen to light. Release the switch and the screen returns to normal.

Press the Player 1 & 2 Start Buttons together to return to the Diagnostic Menu.

DIP SWITCH TEST

The DIP Switch Test allows the operator to check the position of the two 8-position DIP switches on the CPU Board. The operator can also change the setting of each position of each DIP Switch during this mode.

To enter the test, use any joystick to select the DIP Switch Test and any control panel button to activate it. The screen displays a layout of their current settings.

To change a DIP Switch setting, move the switch to the desired setting, then check the screen to verify that the switch now shows the new setting.

Press any control panel button to return to the Diagnostic Menu.

CPU Board Test

The CPU Board Test (much like the Start-up Test) allows the operator to check the RAMs and ROMs.

Select the CPU Board Test with any joystick; then, press any control panel button to activate the automatic test of the CPU Board's RAMs and ROMs. When this test is activated, a "rug" pattern appears on the screen. The screen then changes to show the layout of the RAMs and ROMs on the CPU. Any chip that is shown as black with a white outline is part of the CPU and should turn either red or green during the CPU Test. Any chip that is shown as gray with a white outline is not installed in the game. During the test, chips are good, if they turn green; they are faulty, if they turn red.

Sound Board Test

The Sound Test allows listening to some of the sounds that NBA JAM is capable of producing. This test also emits a tone for each fault that is detected. After completion of this test, the main menu will be automatically returned to the viewing screen.

Monitor Patterns

The Monitor Patterns Test provides a menu for testing the monitor. Select the test with any joystick and activate with any control panel button. Once the Monitor Test is activated, move any joystick to select a Monitor Test option; press any control panel button to activate the option.

The **RED**, **GREEN**, and **BLUE SCREEN** tests fill the screen with either red, green or blue.

The **COLOR BARS** test fills the screen with several gradated colors to help with red, green and blue level adjustments. Each color should appear sharp and clear.

The **CROSSHATCH PATTERNS** test fills the screen with a grid and a series of dots. The grid and the dots should be clear. The dots should appear round.

If any of the Monitor Pattern Tests shows a need for adjustment, use the proper white knobs on the Monitor Board.

Use any joystick to select **RETURN TO MAIN MENU** or **BACK TO DIAGNOSTIC MENU** and activate with any control panel button.

Run Burn-in Test

The Burn-in Test continually repeats the CPU Board Test. Move any joystick to select the Burn-in Test; then, press any control panel button to activate the test. When the Burn-in Test detects an error, the test stops and displays an error message on the screen. Use this test to find intermittent CPU problems.

To exit this test, switch the game OFF then ON again.

COIN BOOKKEEPING

To enter Coin Bookkeeping from the Main Menu, move any joystick to select the Coin Bookkeeping option; then, press any control panel button to activate it.

The Coin Bookkeeping Table records the coinbox totals and game play counters. The left side of the table names the bookkeeping item; the right side shows the number of coins, credits or plays for each item.

To exit Coin Bookkeeping, move any joystick to select RETURN TO MAIN MENU; then, press any control panel button to activate it.

GAME ADJUSTMENTS

NOTE: Game Adjustments are explained in more detail on the following page.

Move any joystick to select the Game Adjustment option on the Main Menu; then, press any control panel button to activate it.

The Game Adjustments option allows the owner/operator to change the Game Pricing and Game Difficulty.

The Game Adjustments Menu offer several options. Each option has its own menu. Move any joystick to select an option; then, press any control panel button to activate that option. On the next menu screen, move any joystick to select the item you wish to modify; then, press any control panel button to activate that item. The activated item provides a setting choice. Move any joystick to change the current setting value; then, press any control panel button to lock in the new setting value. Moving the joystick up increases the setting value, moving the joystick down decreases the setting value.

To exit the Adjustments Menu, use any joystick to select RETURN TO MAIN MENU; then, use any control panel button to activate your selection.

Standard Pricing: Standard Pricing allows the operator to choose any of the "Standard" selections for the Standard Pricing Table.

Custom Pricing: Custom Pricing allows the operator to install pricing other than that of the Standard Pricing Table. Custom Pricing also allows the operator to select the amount of credits required to start a game and the amount of credits required to continue a game. This option is adjusted from the Dip Switch Settings.

Coin Counter Mode: This controls the mechanical coin counter mode.

Free Play: This option selects free play. The setting choices for this adjustment are:

- No (factory)
- Yes

Game Difficulty: Game Difficulty allows the operator to select the difficulty level of the game. The settings for the adjustment are:

- Easiest Setting: 1
- Hardest Setting: 5
- Factory Setting: 3**

Game Timer Speed: Game Timer allows the operator to control the overall game timer speed. The settings for the adjustment are:

- Slowest Setting: 1
- Fastest Setting: 5
- Factory Setting: 3**

Credits for Full Game: Credits for Full Game allows the operator to select the number of credits required to purchase a full game. The settings for the adjustment are:

- Easiest Setting: 4
- Hardest Setting: 16
- Factory Setting: 8**

4 Player Win Bonus: Allows the two winners in a four-player game, that was purchased in full by all players at the beginning, to play the next game for free.

Attract-Mode Sounds: Determines whether the game will make sounds in the attract mode. The settings for the adjustment are:

- On
- Off (factory)

Computer Assistance: Computer assistance helps to keep the game scores close. This causes more excitement and as a result, higher earnings. However, if the operator cares to, computer assistance can be disabled. This may be desirable for tournaments, etc.. Computer assistance can also be disabled by the players using secret button combinations

- On
- Off (factory)

Custom Pricing

**SELECT WITH ANY STICK
PRESS A BUTTON TO MODIFY**

RETURN TO ADJUSTMENTS MENU

- (1) LEFT CHUTE (1) UNITS**
- (1) RIGHT CHUTE (2) UNITS**
- (1) CHUTE (3) UNITS**
- (1) CHUTE (4) UNITS**
- (2) UNITS/CREDIT**
- (3) UNITS/BONUS**
- (4) MINIMUM UNITS REQUIRED**
- (5) CREDITS TO START**
- (6) CREDITS TO CONTINUE**
- (7) COIN PAGE HELP**
- (8) SHOW CREDIT FRACTIONS**
- (9) COINS PER DOLLAR**
- (10) MAXIMUM CREDITS**

- (1) Coins inserted accumulate units. This adjustment specifies the number of units given for each coin in the fourth chute (see "units/credit")
- (2) This is the number of coin units required to buy one credit.
- (3) One bonus credit is awarded after this many coin units have accumulated.
- (4) No credits will be awarded until this many coin units have accumulated.
- (5) Each player needs this many credits to begin a game.
- (6) Each player needs this many credits to continue a game.
- (7) Whenever standard pricing is used, a corresponding message is displayed on the credits screen. Setting this to no disables the message.
- (8) When set to yes, fractional credits will be seen on the credits screen.
- (9) The detailed bookkeeping screen shows total collections based on this many coins per dollar. (Set to zero to disable the display of money totals.)
- (10) This is the limit for the credits counter. Additional coins inserted will be lost. Factory setting is 30.

UTILITIES

Move any joystick to select the Utilities option on the Main Menu; then, press any control panel button to activate it.

The Utilities Menu allows the owner/operator to clear the games bookkeeping memory and to install a custom message.

**SELECT WITH ANY STICK
ACTIVATE WITH ANY BUTTON**

**CLEAR CREDITS
CLEAR COIN COUNTERS
CLEAR GAME AUDITS
CLEAR PLAYER RECORDS
RESET HIGH SCORE
DEFAULT ADJUSTMENTS
FULL FACTORY RESTORE
RETURN TO MAIN MENU**

Utilities Menu

Move any joystick to select an item from the Utilities Menu; then, press any control panel button to activate that item. After an item has been activated, you are given the option of resetting that item or not. For example:

**CLEAR CREDITS?
ARE YOU SURE?**

**YES
NO**

Move any joystick to choose YES or NO; then, press any control panel button to lock your choice and to return to the Utilities Menu.

To exit the Utilities Menu, move any joystick to select RETURN TO MAIN MENU; then, press any control panel button to activate your selection.

Troubleshooting

PROBLEM

POSSIBLE SOLUTION

NO PICTURE OR DISTORTED PICTURE.

Check for faulty CPU board or monitor.
Check for disconnected video signal cable.

TURN GAME ON & NOTHING HAPPENS.

Check line fuse. Check for +5Vdc at pins C, D, 3, and 4 of the JAMMA Connector.

NO SOUND.

Check the speaker and speaker connection to pins L and 10 on the JAMMA Connector. Check volume control setting. Check for +12Vdc at pins F and 6 on the JAMMA Connector. Check interboard wiring from CPU Board to the Sound Board. Be sure the red lin on the ribbon cable is connected to pin 1 on both boards.

MOVE JOYSTICK, AND PLAYER MOVES IN THE WRONG DIRECTION.

Check for open wires between the joystick and CPU board. Check for contamination on the joystick switch contacts and the CPU board pins. Check for proper ground.

PRESS START BUTTON/BOMB BUTTON AND NOTHING HAPPENS.

A joystick switch is wired wrong. Check the JAMMA Chart, the Control Panel Wire List, or the Cabinet Wiring Diagram.

NO CREDIT GIVEN WHEN COINS ARE INSERTED.

Check for open wires between the pushbutton switch and CPU board. Check for contamination on the CPU board pins or the pushbutton switch contacts. Check for proper ground. Be sure pushbutton switches are wired correctly.

TOO MANY CREDITS FOR NUMBER OF COINS INSERTED.

Check DIP Switch coin setting. Check for contamination on the coin switch contacts. Check for an open wire between coin switch 1 and pin 16 on the JAMMA connector or coin switch 2 and pin T of the JAMMA connector.

GAME STAYS IN THE TEST MODE.

Check that switch #8 on DIP Switch #2 is OFF. If you have installed an optional Test Switch be sure it is set to OFF. Be sure the DIP Switch and optional Test Switch are not shorted to ground. You can use the DIP Switch Test to prove this. If the switch shows as closed during the DIP Switch Test but is set in the open position, then the switch is some how shorted to ground.

WARNINGS & NOTICES

Warning

USE OF NON-MIDWAY PARTS OR CIRCUIT MODIFICATIONS MAY CAUSE SERIOUS INJURY OR EQUIPMENT DAMAGE! USE ONLY MIDWAY AUTHORIZED PARTS.

- * For safety and reliability, substitute parts and modifications are not recommended.
- * Substitute parts or modifications may void FCC type acceptance.
- * This game is protected by Federal Copyright, trademark and patent laws. Unauthorized modifications may be illegal under Federal law. This also applies to MIDWAY logos, designs, publications and assemblies. Moreover, facsimiles of MIDWAY equipment (or any feature thereof) may be illegal under federal law, regardless of whether or not such facsimiles are manufactured with MIDWAY components.

Warning

This equipment generates, uses and can emit radio frequency energy and, if not installed properly and used according to the directions in this manual, may cause interference to radio communications. It has been tested and found to comply with the limits for a Class A computing device pursuant to Subpart J of part 15 of FCC rules which are designed to provide reasonable protection against such interference when operated in a commercial environment. Operation of this equipment in a residential area is likely to cause interference to radio communications, in which the user, at his or her own expense, will be required to take whatever measures may be needed to correct the interference.

Warning

Prevent shock hazard and assure proper game operation. Only plug this game into a properly grounded outlet. Do not use a cheater plug to defeat the power cord's grounding pin. Do not cut off the ground pin.

Notice

When MIDWAY ships a game, it is in compliance with FCC regulations. Your sticker is proof. If the sticker is missing or damaged, legal repercussions to the owner or distributor of the game may result. If your game does not contain an FCC sticker, call MIDWAY immediately.

Notice

No part of this publication may be reproduced by any mechanical, photographic, or electronic process, or in the form of a phonographic recording, nor may be transmitted, or otherwise copied for public or private use, without permission from the publisher.

For Service: Call your Authorized MIDWAY Distributor.
